DRYSUIT INFLATION HOSE

This Beaver Drysuit Inflation Hose is an integral part of your life support system and should be treated with as much care as the rest of your equipment. This Hose has been manufactured to stringent quality control regulations, giving you a product which is strong, durable and will give years of trouble-free service, providing a few basic instructions are adhered to.

MODEL: _____

DATE OF PURCHASE: _____

PURCHASED FROM: _____

INSTRUCTIONS

1. Always ensure that the Inflation Hose you purchase is suitable for the application for which it is intended. Inflation hoses must be fitted by an authorised service technician. If you are not sure seek the advice of an authorised Beaver Dealer.
2. Prior to diving, check that your Inflation Hose is securely fitted and is not leaking or damaged. Under no circumstances must you dive with damaged or faulty equipment.
3. To avoid damage to your Inflation Hose do not bend to a diameter of less than 20cm.
4. Do not exceed the maximum working pressure of your Inflation Hose.
5. After use rinse in fresh water. Avoid contact with solvents, detergents, oils, etc.
6. To extend the life of your Inflation Hose use a Beaver Hose Protector, these are available from your Beaver Dealer.
7. Keep away from heat sources, and avoid direct exposure to the sun.
8. A full range of replacement o-rings, silicone grease and hose attachments is available from all Beaver Dealers.
9. Ensure your hoses and all diving equipment is serviced on a regular basis by an authorised technician.
10. All Beaver hoses are manufactured to comply with EN 250.

CAUTION

All watersports are potentially hazardous. Before using any watersports equipment you should be properly instructed and trained in its use by a recognised club or organisation.

PLEASE RETAIN WITH RECEIPT FOR GUARANTEE PURPOSES
