

## FITTING BEAVER LENSES TO THE DISCOVERY MASK WEAR EYE PROTECTION

1. Push the upper side of the protruding notches (A) downwards while pulling them out gently, using the bosses (B) for leverage until the upper sub frame clips (C) are just clear of the frame.

2. Push the bosses (B) inwards (toward the nose) gently to release the outer-lower sub frame clips (D).

3. You may need to gently push the bosses (B) upwards to fully release the sub frame.

4. Remove the old lens(es) and replace with the prescription lens(es), taking care to fit the correct lens power to the correct side as the lenses can be fitted to either side. Ensure the lenses sit securely on the skirt and forms a good seal with no damage, folds or obstructions.

5. Replace the sub frame, beginning at the outer-lower sub frame clip (E) by pressing down and into the frame, repeat on the inner-lower sub frame clips (D) and finally on the upper sub frame clips (C).

The mask should be thoroughly inspected and tested before use.

### CAUTION

*All watersports are potentially hazardous. Before using any water sports equipment you should be properly instructed and trained in its use by a recognised club or organisation.*

**PLEASE RETAIN WITH RECEIPT FOR GUARANTEE PURPOSES**
